UPCOMING SPLIT OF THE CHAIRMAN AND CEO ROLES

RATIONALE FOR THE SEPARATION OF THE ROLES

- The combined Chairman and CEO role served the Company well in the start-up phase of Georgia Capital
- As the Company has continued to mature, it has now become clear that the best structure to further institutionalise the Group is to separate the role of Chairman and CEO
- Separation of the role will improve our governance by adding local knowledge and perspective to the non-executive team and create a better balance between the non-executives and executive management

FOLLOWING THE SEPARATION OF THE ROLES:

- Irakli Gilauri will remain Chairman of the Board and will stay active in key strategic areas
- Irakli holds significant stake in GCAP
- The Board of Georgia Capital will announce a further update in due course with regard to the appointment of a new CEO

INFLATION COMPONENTS

Source: GeoStat

INFLATION TO DECELERATE BUT REMAIN CLOSE TO DOUBLE DIGITS IN 2022

- Annual inflation reached 11.5% in July 2022 (12.9% on average in 7M22) and is expected to decelerate in the 2nd half of the year, partially due to the base effect coming into play from July;
- Food, oil and utility prices have been the main drivers of rising prices throughout the year;
- Despite GEL strengthening, imported inflation has so far been the most significant driver of rising prices, with global food and energy prices contributing the most to elevated price pressures;
- Supply side price pressures are no longer abated by weak domestic demand, as the economic recovery has been rapid;
- Rising prices have been a widespread occurrence, with prices increasing annually on 85% of products in the consumer basket in July, including by more than 5% y-o-y for 69% of products and by more than 10% y-o-y for 49% of products.
