Georgia Capital PLC | 1. The independent valuations of the large and investment portfolio companies are performed on a semi-annual basis. In 4Q23, our private large and investment portfolio companies were valued externally by a third-party independent valuation firm. 2. GCAP has different ownership stakes across schools (70-90%). 3. The LTM EBITDAs used in the valuation assessment of the education business incorporate the functional currency adjustment at certain schools. The LTM EBITDA calculations do not factor the performance of a recently launched schools, which are added to the equity value of the business at cost. Consequently, the EBITDA figures presented on slide 35 may differ from those used in the business valuations. 4. The forward-looking implied valuation multiple is estimated at 10.5x for the 2024-2025 academic year.
